Gb Elaaj — Video Walkthrough & Presentation Guide

CONFIDENTIAL / CHEAT SHEET

Connected Healthcare Ecosystem — Complete Demo Script for Client Presentation

⚡ Quick Setup & Links

Live Local URL:	`http://localhost:3000`
Login Page URL:	`http://localhost:3000/login`
Design Canvas:	`Gb Elaaj.html (Open in browser)`
All Accounts Password:	`DemoPassword123!`

📹 Screen Recording Shortcut (Windows)

Instant Record:	`Win + Alt + R`
Save Location:	`Videos / Captures`
Alternative:	`Snipping Tool (Video Mode)`
Target Duration:	`2 to 3 Minutes Max`

🔑 COMPLETE READY-MADE TEST ACCOUNTS (ALL PASSWORD: DEMOPASSWORD123!)

ROLE	USER NAME	LOGIN EMAIL	WHAT TO SHOW CLIENT
PATIENT	Sana Yousaf	**patient@gbelaaj.pk**	Appointments, Medical records, Lab reports, Pharmacy orders
DOCTOR	Dr. Ayesha Khan	**doctor@gbelaaj.pk**	Upcoming consults, schedule slots, patient history, earnings
SUPER ADMIN	Hassan Iqbal	**admin@gbelaaj.pk**	Doctor PMDC verification, system users, audit logs
PHARMACY	Wahab Hussain	**pharmacy@gbelaaj.pk**	Medicine inventory, stock counts, incoming orders
LAB ADMIN	Chughtai Lab	**lab@gbelaaj.pk**	Diagnostic test catalog, sample bookings, report uploads
NURSE	Nurse Rabia	**nurse@gbelaaj.pk**	Home care visits, patient assignments, live GPS tracking
FINANCE	Maira Khan	**finance@gbelaaj.pk**	15% platform commissions, transaction history, payouts

🎬 3-MINUTE VIDEO RECORDING SCRIPT (STEP-BY-STEP FLOW)

Scene 1: Public Home & Doctor Discovery

0:00 - 0:40 (40s)

Action: Open `http://localhost:3000` in your browser.

- Scroll slowly through the **Hero Section** showing live stats (50+ Verified Doctors, 1,200+ Appointments).
- Show **Specialty Grid** (Cardiology, Gynecology, Pediatrics) & **Services** (Telemedicine, Labs, Pharmacy, Home Nursing).
- Click **"Doctors"** in top navbar: Demonstrate filters by specialty & city (e.g. Gilgit, Islamabad).
- Click on **Dr. Ayesha Khan** to show verified PMDC badge, qualifications, fee, and available video consultation modes.

> 💬 ***What to say (or text overlay):*** *"Yeh platform ka public interface hai jahan patient verified doctors search kar sakta hai, specialties dekh sakta hai aur direct appointment book kar sakta hai."*

Scene 2: Patient Portal Experience

0:40 - 1:25 (45s)

Action: Go to `http://localhost:3000/login` ➔ Enter `patient@gbelaaj.pk` | `DemoPassword123!`

- Show the **Patient Dashboard**: Upcoming video appointment with Dr. Ayesha Khan.
- Click **"Medical Records"**: Show existing prescriptions and consultation summaries stored securely.
- Click **"Lab Reports"**: Show Complete Blood Count (CBC) digital report with status.
- Click **"Pharmacy"**: Show medicine order history with delivery status ("Out for delivery").
- Log out from top right profile icon.

> 💬 ***What to say:*** *"Patient login karke apni appointments, medical history, lab reports aur pharmacy orders ek hi dashboard se manage kar sakta hai."*

Scene 3: Doctor Portal & Schedule Management

1:25 - 2:10 (45s)

Action: Go to `/login` ➔ Enter `doctor@gbelaaj.pk` | `DemoPassword123!`

- Show **Doctor Dashboard**: Today's schedule, pending consultations, and active patient queue.
- Show **Time Slots / Schedule**: Demonstrating how doctor configures custom video & clinic availability.
- Show **Earnings / Wallet**: Automated calculation of consultation revenue and platform fee deductions.
- Log out.

> 💬 ***What to say:*** *"Doctor portal me doctors apni availability slots set karte hain, video consultations conduct karte hain aur apni earnings aur payouts monitor karte hain."*

Scene 4: Super Admin Control & Doctor Verification

2:10 - 2:45 (35s)

Action: Go to `/login` ➔ Enter `admin@gbelaaj.pk` | `DemoPassword123!`

- Click **"Doctor Verification"**: Show the PMDC approval queue with "Approve" / "Reject" controls.
- Explain that no doctor can appear publicly without Super Admin's license verification.
- Show **Audit Log & User Management**: Total system oversight.
- Log out.

> 💬 ***What to say:*** *"Super Admin ke paas mukammal control hai. Koi bhi doctor tab tak live nahi hota jab tak Admin unka PMDC medical license verify karke approve na kare."*

Scene 5: Bonus UI/UX Design Canvas Showcase

2:45 - 3:05 (20s)

Action: Open `Gb Elaaj.html` in a new browser tab.

- Show the full interactive design canvas showing all artboards (Desktop, Tablet, Mobile responsive screens).
- Highlights design tokens, typography, and clean design system.

> 💬 ***What to say:*** *"Iske sath complete interactive design system aur mobile/desktop responsive design boards bhi fully implemented hain."*

💬 ANTICIPATED CLIENT QUESTIONS & STRONGEST ANSWERS

Q1: "Is the system 100% working and ready?"

Answer: "Yes, the complete core engine (Next.js 15, PostgreSQL database, Prisma ORM, Auth.js) is 100% functional. All 7 role portals (Patient, Doctor, Admin, Pharmacy, Lab, Nurse, Finance) are fully built and running. For full public launch, we simply plug in the production credentials (Agora for live video, Mapbox for maps, and payment gateway)."

Q2: "How will doctors and patients get onto the platform when launched?"

Answer: "Patients can self-register in 30 seconds via phone/email. Doctors register via 'Join as Doctor' with their PMDC license number and degrees. Every doctor remains in 'Pending' status until Super Admin manually verifies their license and approves them."

Q3: "How does the system ensure safety for Home Nursing and Labs?"

Answer: "Every nurse profile requires Pakistan Nursing Council (PNC) registration and police character clearance. Additionally, real-time GPS tracking (Mapbox) records the exact arrival and departure times of nurses and sample-collection riders."

Q4: "Can a patient in Gilgit consult an Islamabad doctor, but get medicine locally?"

Answer: "Absolutely! Doctor consultations are digital/video (location independent), while Pharmacies and Labs are strictly hyper-local (city-filtered). Patients receive an instant PDF E-Prescription which they can either purchase from their neighborhood pharmacy or order via local city delivery."

Q5: "How does the platform make money?"

Answer: "The platform has an automated commission split engine built in (15% on consultations, 8% on pharmacy, 12% on lab tests). Every transaction automatically splits between the provider's wallet and the platform's revenue."
